 Shannu.pudi@outlook.com

 www.linkedin.com/in/shanmukh-pudi

Dynamic and solution-oriented Software Engineer, seeking opportunities in Frontend or UI Engineer role where I can apply my experience in building workflow systems, API integrations, and data-driven tools to improve operational efficiency.

Core Competencies

- Front-End Development
- React Development
- Component Architecture
- UI/UX Implementation
- Dashboard & Data Visualization
- API Integration
- Workflow Automation
- Full - Stack Development
- Frontend Performance
- Authentication & Authorization
- Responsive Web Design
- Version Control & Git

Technical Skills

- Languages: JavaScript (ES6+), HTML5, CSS3, Typescript
- Frameworks & Libraries: React, Vite, Tailwind CSS, React Router, Angular
- Back-End Technologies: Node.js, Express.js, RBAC, JWT Auth
- Database: MongoDB, Firestore, ETL/ELT Pipelines
- Tools & Platforms: Google Appscript, Looker Studio, Github, Tesseract OCR, Figma

Profile Summary

Frontend Engineer with 3+ years of experience building scalable workflow systems, dashboard application, and automation tools using React, TypeScript and modern JavaScript. Experienced in developing reusable UI architectures, integrating REST APIs, designing data-driven interfaces that improve operational efficiency. Seeking a Frontend or Software Engineer role to contribute to impactful, user-centric product development.

Work Experience

Mohan Marketing Vizag Private Limited
Software Engineer

Oct 2023 – Apr 2026

- Key Result Areas:**
- Proven ability to design and develop responsive, interactive web interfaces for internal workflow and operations management systems using React and JavaScript, improving usability and cross-team adoption.
 - Skilled in building reusable, modular UI component libraries that reduced development time across multiple internal tools, ensuring visual consistency and scalable frontend architecture.
 - Proficient in integrating REST APIs into frontend applications, enabling real-time data rendering for lead tracking, workflow progress monitoring and performance dashboards.
 - Demonstrated experience crafting data-rich dashboard UIs using Looker Studio and custom JavaScript components to surface KPIs, empowering management with clear, visual decision-making tools.
 - Strong background in implementing form-heavy, workflow-driven interfaces with robust client-side validation, error handling and state management for multi-step operational processes.
 - Proven ability in to consume and render structured data from ETL pipelines in the UI, presenting cleaned datasets through dynamic tables, filters and visual components.
 - Experienced in optimizing frontend performance through efficient component structuring, minimizing unnecessary re-renders and streamlining data-fetching patterns for faster load times.
 - Adept at maintaining and iterating on production UI systems independently - handling version control, bug fixes and feature rollouts with full ownership end-to-end.

Mind Brink
Research Analyst

Jul 2022 – Feb 2023

- Key Result Areas:**
- Led and coordinated a team of 10 analysts to gather, validate, and synthesise large datasets for operational decision-making.
 - Delivered structured insight reports to senior management, translating complex data into clear, actionable recommendations.
 - Collaborated cross-functionally with multiple departments, strengthening stakeholder communication and project management skills.

Education

- Bachelor of Technology (B.Tech.) in Computer Science
Avanthi Institute of Engineering & Technology
- Sri Chaitanya Junior College

Key Achievements

- End-to-end ownership of 8+ production systems deployed independently.
- Drove full digital transformation introducing automation, dashboards & structured data tracking.
- Sole architect & maintainer of core operational infrastructure at current organization.

Projects

Hotel Booking System - Atlantis || MERN Stack - Personal Project

- Architected and built a fully responsive, mono-repo, dual-application frontend - a user-facing booking interface and a separate admin panel - using React with clean component separation and role-based UI rendering.
- Implemented end-to-end secure authentication using JWT and role-based access control (RBAC), with full backend API coverage for bookings, users, and inventory.
- Developed real-time room availability UI with dynamic state updates, delivering a smooth, feedback-rich booking experience without full-page reloads.
- Integrated full backend API coverage for bookings, users, and inventory - handling async data fetching, loading states, error boundaries and optimistic UI updates.

Workflow Management Platform - In Development

- Designing a modular workflow platform inspired by real business use cases, with reusable page-level components, dynamic routing and role-driven UI rendering for a SaaS workflow product.
- Implementing scalable state management patterns and component composition strategies to support multi-user, real-time workflow interactions.
- Applying design system principles - consistent spacing, typography tokens and component variants - to maintain visual coherence across the growing applicaiton.

Personal Portfolio Website

- Designed and developed a fully responsive portfolio site showcasing projects and technical skills, with interactive UI elements and smooth navigation.

Internships

Truprojects

- Conducted data analysis to evaluate and interpret the impact of COVID-19 vaccination on public health outcomes.

Personal Details

- Date of Birth: 15 January 2001
- Languages Known: English, Telugu, Hindi
- Present Address: Dabagardens, Visakhapatnam -530020.
